

Sociology of Natural Resources and Environment (RSOC 5650/6650)

This course focuses on the framing of, and discussion surrounding, environmental and natural resource issues. The drivers of production and consumption including the role of science and technology will be considered. Also addressed are the topics of risk and disaster, governance and politics, resource dependence, and community resilience.

Application

Students will have an opportunity to apply course concepts and theories as they explore a real-world natural resource and/or environmental problem in the Gulf of Mexico region.

Spring, 2017, Tues/Thurs - 12:30 P.M to 1:45 P.M.

Dr. Worosz

Agricultural Economics and Rural Sociology
