During this trip you will learn and gain hands-on experience in water and environmental management from a Latin American perspective, while learning and immersing yourself in the cultural of Panama, interact with locals and enjoy Panamanian gorgeous landscapes and wildlife. The course is designed to give students a general understanding of the potential impacts of climate change on Panama’s water resources through a mix of lectures, fieldwork and trips.

March 10-18, 2018
Est. Cost: $1,703 +air
Includes: Lodging, meals, in-country transportation, excursions.
Signup by: December 2017

Dr. Chandana Mitra will lead the course and is passionate about Climate change communication to the masses. Dr. Mitra’s primary research interests are in the field of urban climate, urban land cover, urban land use change, growth dynamics in developing countries, urban growth models, mesoscale weather processes and modeling, climate change, satellite remote sensing and GIS.
